The company

**Copaco**

**Rijksweg 125**

**8531 Bavikhove, BELGIUM**

is granted authorization according to Oeko-Tex® Standard 100 to use the Oeko-Tex® mark, based on our test report 1454

**Tested for harmful substances**  
according to Oeko-Tex® Standard 100

1306019

Centexbel

for the following articles:

**Coated fabrics based on fibreglass-PVC coating, in different colours**

- Sunscreens: Serge 600, Natté 300, Natté 380, Natté 390, Natté 420, Verso 1, Verso 3, Déco N203, Blockout Serge 600

- Insectscreens

**Fabrics based on recycled polyester fibre: Uiterlo**

The results of the inspection made according to Oeko-Tex® Standard 100, **product class IV** have shown that the above mentioned goods meet the human-ecological requirements of the standard presently established for decoration material.

The certified articles fulfil the requirements of Annex XVII of REACH (incl. the use of azo-dyes, nickel, etc.) as well as the American requirement regarding total content of lead in children's articles (CPSIA; with the exception of accessories made from glass).

The holder of the certificate, who has issued a conformity declaration according to ISO 17050-1, is under an obligation to use the Oeko-Tex® mark only in conjunction with products that conform with the sample initially tested. The conformity is verified by audits.

**This authorisation is valid until 30.06.2014**

## Subject: use of SVHC according to article 33 of the REACH regulation

Date: 20/06/2011

Dear Customer,

As professional manufacturer, COPACO respects the new European regulation 1907/2006 from 18<sup>th</sup> December 2006, applied from the 1st of June 2007.

This regulation, called REACH, has as purpose to document all chemical substances. The European Chemical Agency (ECHA) has included 53 substances of very high concern in the 'Candidate List' now published on the ECHA website.

According to article 59 of the new REACH regulation, COPACO confirms, as EU & EEA supplier, that his products do not contains SVHC (Substances of Very High Concern) from the 'Candidate list' above a concentration of 0.1% weight by weight (w/w). Article 33 regulates information only for the case if the article contains more than 0.1% of a substance registered in the list of candidates.

The current list of published substances (dated 20th June 2011) can be found on the website [http://echa.europa.eu/chem\\_data/candidate\\_list\\_table\\_en.asp](http://echa.europa.eu/chem_data/candidate_list_table_en.asp).
